#### **DETAILED ACTION**

## Response to Arguments

Applicant's arguments, see Remarks, filed October 5, 2006, with respect to the rejection of claims 1-19 over Hunt, alone or in combination with other references, have been fully considered and are persuasive. The rejections of claims 1-19 have been withdrawn.

## Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by McRae (U.S. Patent No. 3,978,855).

With respect to claim 20: McRae teaches a tissue treatment apparatus comprising: a nontoxic chemical substance sprayed into or onto a tissue site, the nontoxic chemical substance being adapted to expand from a liquid phase into a solid, porous phase upon application into or onto the tissue site thereby forming a porous polyurethane foam pad having a smooth, partial outer surface and an inner body (Col. 4, lines 53-58); the partial outer surface having pores therein of a first average size and the inner body having pores of a second average size, wherein said second average size is greater than said first average size due to compression applied to cause cells near at least one surface of said foam to collapse either temporarily or permanently, decreasing their pore size and thus creating a microporous skin on at least that particular surface area (i.e. creating a partial outer surface), leaving the cells in areas remote from said skin (those in the inner body) at their original size, which is now larger compared to the pores at

Art Unit: 3761

the skin surface). The said nontoxic chemical substance are capable of, and adapted to, communicate with components of a negative pressure treatment system when the components are located in or on the tissue site. (Col. 6, lines 60-65)

#### Allowable Subject Matter

Claims 1-19 are allowed.

### Reasons for Indicating Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: A thorough search of the prior art of record did not disclose a reference, alone or in combination with other references, that teaches or fairly suggests all of the limitations of independent claims 1 and 10. The closest prior art of record is the combined teaching of Hunt and McRae. The teachings of Hunt and McRae have been addressed in detail with respect to claims 1-19 in the previous Office action and will not be discussed herein. The combined teaching of Hunt and McRae teaches all of the limitations of independent claims 1 and 10, however, in light of the statement of common ownership of the prior art of Hunt and the instant Application at the time the claimed invention was made, the prior art of Hunt is no longer valid, and thus the combined teachings of Hunt and McRae, Hunt and McRae and Shioya, and Hunt and McRae and Shioya and Coffee are also no longer valid under 35 U.S.C. 103(c).

Art Unit: 3761

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie J. Hand whose telephone number is 571-272-6464. The examiner can normally be reached on Monday-Thursday 8:00-5:30, alt. Fridays 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tatyana Zalukaeva can be reached on 571-272-1115. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
